

RAG Learning Sample Document

Welcome to your first RAG project.

RAG stands for Retrieval-Augmented Generation. It allows an AI application to search information from documents and use that information when answering questions.

Our Sample Company

BrightTech is a fictional technology company based in Dallas, Texas. The company develops software for small businesses. BrightTech has 120 employees.

Employee Benefits

BrightTech employees receive 20 paid vacation days each year. Employees also receive health insurance and five paid sick days.

Work Schedule

The normal work schedule is Monday through Friday from 9:00 AM to 5:00 PM. Employees may work remotely on Mondays and Fridays.

Purpose of This PDF

We will use this document to learn PDF loading, text extraction, chunking, embeddings, vector databases, retrieval, and eventually how to build a complete RAG chatbot.
